Job Portal

Software Requirements Specification (SRS)

Project for .NetCore/Angular Training Boot Camp

Introduction

1. Provide a brief overview of the job portal system and its purpose.
2. Highlight the importance of clearly defining the system requirements to ensure successful development and implementation.

Purpose

1. Clearly state the purpose of the SRS document for the job portal system.
2. Explain that the purpose is to capture and document the functional and non-functional requirements of the system.

Scope

1. Define the scope of the job portal system.
2. Describe the main functionalities and features that will be included in the system.
3. Specify any specific limitations or exclusions in terms of features or functionality.
4. Identify the user roles or types of users that the system will cater to, such as job seekers, employers, and administrators.

Objectives

1. State the high-level objectives of the job portal system.
2. Describe the goals or problems the system aims to address.

Functional Requirements

Primary actors of the system

Identify the primary actors of the system, such as users, administrators, or external systems.

Use Case Diagrams

This section illustrates the system's interactions with external entities and actors, showcasing high-level functionalities.

User Stories

This section illustrates specific user interactions or system functionalities.

"Please include at least two user stories here, and if available, kindly provide the link to the document containing the user stories."

Business Process Diagram

Create a Business Process Diagram to illustrate the workflow or business process within the system in the form of BPMN.

"kindly provide the link to the document."

Non-Functional Requirements

Identify and specify the non-functional requirements of the system, such as performance, reliability, security, usability, etc.

Technical Requirements

Identify and specify any specific technical requirements for the system, such as hardware or software dependencies, compatibility requirements, programming languages, frameworks, or platforms to be used.

Conclusion

Summarize the key points of the SRS document. Provide any closing remarks or recommendations.
